

Brisa Air Purifier AP-200 and AP-400

User Manual, revision 1.0

About this manual

This manual covers two models: the compact AP-200 and the larger AP-400. Read the setup section for your model before first use. Specifications, operating modes and maintenance are described for both models.

Safety instructions

Use the purifier indoors only. Do not use the purifier in bathrooms or other rooms where water may splash on the unit.

Always unplug the purifier before cleaning it or replacing a filter.

Do not cover the air inlet or the air outlet. Do not insert objects into the fan opening.

Keep the power cable away from heat sources. If the cable is damaged, stop using the purifier and contact Brisa support.

Setup: AP-200

Setup of the AP-200 takes about 5 minutes.

Step 1. Remove the purifier from the box and open the back cover.

Step 2. Remove the plastic wrap from the HEPA filter and put the filter back with the arrow pointing towards the unit.

Step 3. Place the AP-200 on a flat surface at least 30 cm away from walls and furniture.

Step 4. Plug in the power cable and press the power button once.

The AP-200 starts in Auto mode. No calibration is needed.
